DOCKET FILE COPY ORIGINAL

OFFICE OF THE CHAIRMAN FEDERAL COMMUNICATIONS COMMISSION

WASHINGTON

AUG 1 6 1993

FX PARTE OR LATE FILED

34

Honorable Ralph Hall House of Representatives 2236 Rayburn House Office Building Washington, DC 20515

Dear Congressman Hall:

FEDERAL COMMUNICATIONS COMMISSION OFFICE OF THE SECRETARY 9302989

Thank you for your letter expressing concern about how our new cable regulations may affect small cable systems.

As you know, our rate regulations are currently under reconsideration. Accordingly, your comments are being made part of the record of that proceeding (MM Docket No. 92-266).

In addition, I wish to reiterate my own concerns about the regulatory impact of the 1992 Cable Act on small cable systems, especially those not affiliated with any MSO. I have directed the staff to explore a number of alternatives designed to alleviate the burdens that would otherwise be imposed on small systems to insure they remain a viable part of the telecommunications infrastructure. I assure you that the Commission is making every effort to minimize any negative repercussions for small operators resulting from reregulation, within the bounds of the discretion provided to us by the Act itself.

As to your question regarding the customer service obligations of small cable systems, the specific issue of office locations is pending in our reconsideration of those rules and your comments will be made a part of that record as well (MM Docket No. 92-263). We can clarify, however, that there is no FCC requirement to maintain an office in each service area community. The relevant provision of our rules, 47 C.F.R. § 76.309(4)(c)(v), setting up a federal standard that local franchising authorities may exceed if they wish, requires only that a "customer service center" and "bill payment locations" be "conveniently located." A customer service center could be an equipment dropoff location open at least during normal business hours; a bill payment location could be a mail receptacle. A franchising authority may, however, in its discretion, require a cable operator to maintain an office in the service area community.

I assure you that your comments will be carefully weighed in our reconsideration proceedings.

Sincerely,

James H. Quello

OFFICE OF THE CHAIRMAN

> Honorable Michael A. Andrews House of Representatives 303 Cannon House Office Building Washington, DC 20515

Dear Congressman Andrews:

Thank you for your letter expressing concern about how our new cable regulations may affect small cable systems.

As you know, our rate regulations are currently under reconsideration. Accordingly, your comments are being made part of the record of that proceeding (MM Docket No. 92-266).

In addition, I wish to reiterate my own concerns about the regulatory impact of the 1992 Cable Act on small cable systems, especially those not affiliated with any MSO. I have directed the staff to explore a number of alternatives designed to alleviate the burdens that would otherwise be imposed on small systems to insure they remain a viable part of the telecommunications infrastructure. I assure you that the Commission is making every effort to minimize any negative repercussions for small operators resulting from reregulation, within the bounds of the discretion provided to us by the Act itself.

As to your question regarding the customer service obligations of small cable systems, the specific issue of office locations is pending in our reconsideration of those rules and your comments will be made a part of that record as well (MM Docket No. 92-263). We can clarify, however, that there is no FCC requirement to maintain an office in each service area community. The relevant provision of our rules, 47 C.F.R. § 76.309(4)(c)(v), setting up a federal standard that local franchising authorities may exceed if they wish, requires only that a "customer service center" and "bill payment locations" be "conveniently located." A customer service center could be an equipment dropoff location open at least during normal business hours; a bill payment location could be a mail receptacle. A franchising authority may, however, in its discretion, require a cable operator to maintain an office in the service area community.

I assure you that your comments will be carefully weighed in our reconsideration proceedings.

Sincerely,

James H. Quello

I assure you that the Commission is making every effort to minimize any negative repercussions for small operators resulting from reregulation, within the bounds of the discretion provided to us by the Act itself.

As to your question regarding the customer service obligations of small cable systems, the specific issue of office locations is pending in our reconsideration of those rules and your comments will be made a part of that record as well (MM Docket No. 92-263). We can clarify, however, that there is no FCC requirement to maintain an office in each service area community. The relevant provision of our rules, 47 C.F.R. § 76.309(4)(c)(v), setting up a federal standard that local franchising authorities may exceed if they wish, requires only that a "customer service center" and "bill payment locations" be "conveniently located." A customer service center could be an equipment dropoff location open at least during normal business hours; a bill payment location could be a mail receptacle. A franchising authority may, however, in its discretion, require a cable operator to maintain an office in the service area community.

I assure you that your comments will be carefully weighed in our reconsideration proceedings.

Sincerely,

James H. Quello

OFFICE OF

Honorable Ronald Coleman House of Representatives 440 Cannon House Office Building Washington, DC 20515

Dear Congressman Coleman:

Thank you for your letter expressing concern about how our new cable regulations may affect small cable systems.

As you know, our rate regulations are currently under reconsideration. Accordingly, your comments are being made part of the record of that proceeding (MM Docket No. 92-266).

In addition, I wish to reiterate my own concerns about the regulatory impact of the 1992 Cable Act on small cable systems, especially those not affiliated with any MSO. I have directed the staff to explore a number of alternatives designed to alleviate the burdens that would otherwise be imposed on small systems to insure they remain a viable part of the telecommunications infrastructure. I assure you that the Commission is making every effort to minimize any negative repercussions for small operators resulting from reregulation, within the bounds of the discretion provided to us by the Act itself.

The Honorable James H. Quello Chairman
Federal Communications Commission
1919 M Street, N.W., Room 802
Washington, D.C. 20554

Dear Chairman Quello:

As Members of the Texas Congressional delegation we are writing to urge you to take action to alleviate unnecessary burdens on small cable operators resulting from the Commission's recently published regulations.

As you are aware, Section 623(i) of the Cable Act "requires that the Commission develop and prescribe cable rate regulations that reduce the administrative burdens and cost of compliance for cable systems that have 1,000 or fewer subscribers." This provision was included in the Cable Act in an effort to protect small cable operators from excessive administrative burdens.

However, the FCC's proposed regulations impose virtually the same requirements on small system operators that are imposed on larger systems. These regulations which are very complex and time consuming put the majority of small cable systems at a disadvantage and may jeopardize their very existence. Such small systems simply lack the human and financial resources to bear the burden of regulations that require the services of a professional accountant and place severe restrictions on their ability to recover costs.

We are requesting that the Commission take a number of steps to ease the regulatory burden imposed on small cable systems, thereby assuring existing services to subscribers in rural or semi-rural areas. Specifically, we urge the Commission:

- o Permit rate regulation based on a simplified net income analysis which would be easier to calculate and apply than the benchmark approach.
- o Allow small operators to set rates up to the benchmark cap.
- Allow small operators to set rates, taking into consideration costs associated with expansion and providing new services when setting such rates.
- Permit systems to base rates on the bundling of service and equipment charges.
- o Clarify that small operators are not required to maintain local offices in each service area community, unless the population density of the community justifies maintaining such a local office.

We are confident that these actions will accomplish the intent of Section 623(i) of the Cable Act and at the same time maintain the Act's consumer protections. Thank you for your consideration of this matter and we look forward to hearing from you soon.

.ook forward to nearing from you	soon.	
	Sincerely,
